ACI (Azure Container Instances), Key Terms
AKS (Azure Kubernetes Service), Key Terms
alerts, defined, Key Terms
Amazon ECR, defined, Key Terms
Amazon EKS, defined, Key Terms
Amazon Mechanical Turk, Mechanical Turk Data Labeling
antipatterns, Critical Challenges in MLOps-Focus on Prediction Accuracy Versus the Big Picture
API services, authentication, Authenticating API Services
App Engine (see Google App Engine)
App Runner, AWS CaaS, AWS App Runner Flask microservice-AWS App Runner Flask microservice
app.py, MLOps Cookbook on AWS
Apple
  Core ML (see Core ML)
  Create ML, Apple's AutoML: Create ML-Apple's AutoML: Create ML
  mobile development ecosystem, Apple's Ecosystem-Apple's Core ML Tools
ASICS, DevOps and MLOps combined best practices?
authentication
  API services, Authenticating API Services
  authenticating microservices to cloud functions, Authenticating to Cloud Functions-Authenticating to Cloud Functions
  Azure, Authentication-Authenticating API Services
  key-based, Authenticating API Services
  service principal, Service Principal-Service Principal
automated checks, Automated checks
Automator's law, Cloud Computing Foundations and Building Blocks, AutoML
AutoML, Cloud Computing Foundations and Building Blocks, AutoML and KaizenML-Conclusion

Apple's ecosystem and, Apple’s Ecosystem-Apple’s Core ML Tools
AWS, AWS AutoML-AWS AutoML
Azure AutoML, Azure’s AutoML-Azure’s AutoML
basics, AutoML-Feature Stores
Create ML, Apple’s AutoML: Create ML-Apple’s AutoML: Create ML
data science versus, MLOps Industrial Revolution
Feature Stores, Feature Stores-Feature Stores
FLAML, FLAML-FLAML
Google's AutoML and edge computer vision, Apple’s Core ML Tools-Apple’s Core ML Tools
Kaizen versus KaizenML, Kaizen Versus KaizenML-Kaizen Versus KaizenML
Ludwig, Ludwig
MLOps industrial revolution, MLOps Industrial Revolution-MLOps Industrial Revolution
model explainability, Model Explainability-Model Explainability
open source solutions, Open Source AutoML Solutions-FLAML
autoscaling, defined, Key Terms
AWS, MLOps for AWS-Conclusion
AutoML, AWS AutoML-AWS AutoML
AWS Lambda recipes, AWS Lambda Recipes-AWS Lambda-SAM Containerized Deploy
basics, Introduction to AWS-MLOps on AWS
best practices for bootstrapping MLOps capabilities, Conclusion
CaaS, AWS CaaS-AWS CaaS
career advice with AWS ML evangelist Julien Simon, Applying AWS Machine Learning to the Real World-Applying AWS Machine Learning to the Real World
certification options, AWS Certifications-Machine Learning Implementation and Operations (MLOps)
Certified Machine Learning specialist certification, Rise of the Machine Learning Engineer and MLOps
CLI tools for MLOps Cookbook project, CLI Tools-CLI Tools
computer vision, Computer vision-Computer vision
DataOps tools, DataOps and Data Engineering
Flask microservice, Flask Microservice-AWS App Runner Flask microservice

getting started with, Getting Started with AWS Services-Computer vision
Hugo static S3 websites, Using Hugo static S3 websites-Using Hugo static S3 websites
MLOps Cookbook on, MLOps Cookbook on AWS-AWS App Runner Flask microservice
MLOps on, MLOps on AWS-MLOps on AWS
no-code/low-code AWS Comprehend solution, Using the “No Code/Low Code” AWS Comprehend solution
real-world ML applications, Applying AWS Machine Learning to the Real World-Applying AWS Machine Learning to the Real World
serverless cookbook, Serverless Cookbook-Serverless Cookbook
Sports Social Network case study, Applying AWS Machine Learning to the Real World-Applying AWS Machine Learning to the Real World
AWS App Runner, AWS CaaS, AWS App Runner Flask microservice-AWS App Runner Flask microservice
AWS Certified Machine Learning - Specialty certification, AWS Certified Machine Learning - Specialty-Machine Learning Implementation and Operations (MLOps)
data engineering, Data Engineering-Data Engineering
exploratory data analysis, Exploratory Data Analysis (EDA)-Exploratory Data Analysis (EDA)
MLOps, Machine Learning Implementation and Operations (MLOps)
AWS Cloud Practitioner, certification test questions for, AWS Cloud Practitioner and AWS Solutions Architect-AWS Cloud Practitioner and AWS Solutions Architect
AWS Cloud9, Cloud Shell Development Environments, Using Hugo static S3 websites, Key Terms
AWS Cloudshell, Cloud Shell Development Environments-Cloud Shell Development Environments
AWS CloudWatch, Observability for Cloud MLOps
AWS Comprehend, Using the “No Code/Low Code” AWS Comprehend solution
AWS DeepLens, Computer vision-Computer vision
AWS DeepRacer, Machine Learning Key Concepts

AWS Lambda, Python Crash Course
defined, Key Terms
deploying with SAM, AWS Lambda Recipes-AWS Lambda-SAM Containerized Deploy
recipes, AWS Lambda Recipes-AWS Lambda-SAM Containerized Deploy
SAM containerized deploy, AWS Lambda-SAM Containerized Deploy-AWS Lambda-SAM Containerized Deploy
SAM Local, AWS Lambda-SAM Local
serverless applications, Serverless Cookbook-Serverless Cookbook
AWS S3
Hugo static S3 websites, Using Hugo static S3 websites-Using Hugo static S3 websites
SageMaker and, Monitoring Drift with AWS SageMaker-Monitoring Drift with AWS SageMaker
AWS SageMaker (see SageMaker)
AWS Serverless Application Model (see SAM)
AWS Solutions Architect certification test questions, AWS Cloud Practitioner and AWS Solutions Architect-AWS Cloud Practitioner and AWS Solutions Architect
Azure, MLOps for Azure-Conclusion
Application Insights, Application Insights
authenticating API services, Authenticating API Services
authentication, Authentication-Authenticating API Services
Azure CLI and Python SDK, Azure CLI and Python SDK-Azure CLI and Python SDK
Azure Machine Learning designer, Azure Machine Learning Designer-Azure Machine Learning Designer
compute instances, Compute Instances-Compute Instances
debugging locally, Debugging Locally-Debugging Locally
deploying, Deploying-Versioning Datasets
deploying a model, Deploying a Model-Deploying a Model
deploying models to a compute cluster, Deploying Models to a Compute Cluster-Deploying a Model
deploying ONNX to, Deploy ONNX to Azure-Deploy ONNX to Azure
Microsoft Certified: Azure Data Scientist certification, Rise of the Machine Learning Engineer and MLOps

ML lifecycle, ML Lifecycle
ML pipelines, Azure ML Pipelines-Azure Machine Learning Designer
MLOps for, MLOps for Azure-Conclusion
publishing pipelines, Publishing Pipelines
registering models, Registering Models-Registering Models
retrieving logs, Retrieving Logs
service principal, Service Principal-Service Principal
troubleshooting deployment issues, Troubleshooting Deployment Issues-Debugging Locally
versioning datasets, Versioning Datasets
Azure AI Engineer Associate certification, Azure Data Scientist and AI Engineer
Azure Associate Data Scientist certification, Azure Data Scientist and AI Engineer
Azure AutoML, Azure's AutoML-Azure's AutoML
Azure Container Instances (ACI), Key Terms
Azure Kubernetes Service (AKS), Key Terms
Azure ML, monitoring drift with, Monitoring Drift with Azure ML-Monitoring Drift with Azure ML
Azure Percept, Azure Percept
Azure Pipelines, Build an MLOps Pipeline from Zero-Build an MLOps Pipeline from Zero

B

Baseball_Predictions_Export_Model.ipynb, MLOps Cookbook on AWS
baseline dataset, target dataset versus, Monitoring Drift with AWS SageMaker
Bash shell, Bash Shell and Commands-Writing a Script
configuration, Configuration
files and navigation, Files and Navigation
input/output, Input/Output
list files, List Files
run commands, Run Commands
writing a script, Writing a Script
BigQuery (see Google BigQuery)

bind mount, Porting Over Non-TPU Models
black tool (Python), Key Terms
Blake, William, Getting a Job: Don't Storm the Castle, Walk in the Backdoor
blue-green deployment, Controlled Rollout of Models
Bogen, Joseph, Origin of Chapter Quotes, Introduction to MLOps, MLOps Foundations, MLOps for Containers and Edge Devices, Continuous Delivery for Machine Learning Models, AutoML and KaizenML, Monitoring and Logging, MLOps for AWS, MLOps for Azure, MLOps for GCP, Machine Learning Interoperability, Building MLOps Command Line Tools and Microservices, Machine Learning Engineering and MLOps Case Studies
build server, defined, Key Terms

C

CaaS (see container as a service)
canary deployment, Controlled Rollout of Models
career planning
  pear (PPEAR) revenue strategy, Pear Revenue Strategy-Rule of 25%
  thinking like a venture capitalist, Think Like a VC for Your Career
case studies, Machine Learning Engineering and MLOps Case Studies-Conclusion
  critical challenges in MLOps, Critical Challenges in MLOps-Focus on Prediction Accuracy Versus the Big Picture
  ethical/unintended consequences, Ethical and Unintended Consequences
  Francesca Lazzeri interview, Focus on Prediction Accuracy Versus the Big Picture
  intermittent fasting, Data Science Case Study: Intermittent Fasting-Notes on Intermittent Fasting, Blood Glucose, and Food
  MLOps projects as Sqor sports social network, MLOps Projects at Sqor Sports Social Network-Athlete Intelligence (AI Product)
  perfect technique versus the real world, The Perfect Technique Versus the Real World-The Perfect Technique Versus the Real World
  Piero Molino interview, Focus on Prediction Accuracy Versus the Big Picture-Focus on Prediction Accuracy Versus the Big Picture

unlikely benefits of ignorance in building ML models, Unlikely Benefits of Ignorance in Building Machine Learning Models-Unlikely Benefits of Ignorance in Building Machine Learning Models
CD (see continuous delivery (CD))
certifications, Technology Certifications-SQL-Related Certifications
AWS Certified Machine Learning - Specialty, AWS Certified Machine Learning - Specialty-Machine Learning Implementation and Operations (MLOps)
AWS Cloud Practitioner, AWS Cloud Practitioner and AWS Solutions Architect-AWS Cloud Practitioner and AWS Solutions Architect
AWS Solutions Architect, AWS Cloud Practitioner and AWS Solutions Architect-AWS Cloud Practitioner and AWS Solutions Architect
Azure Data Scientist/AI Engineer, Azure Data Scientist and AI Engineer
SQL-related, SQL-Related Certifications
challenges in MLOps
ethical/unintended consequences, Ethical and Unintended Consequences
focus on prediction accuracy versus the big picture, Focus on Prediction Accuracy Versus the Big Picture
lack of operational excellence, Lack of Operational Excellence
Charpentier, Emmanuelle, AutoML
CI/CD (continuous integration/continuous delivery)
implementation of, DevOps and MLOps
parallels to recovery from sports injuries, Continuous Delivery for Machine Learning Models
CI/CD pipeline, quality-control checks for, Getting Started with Cloud Computing
CircleCI, defined, Key Terms
CLI tools (see command line interface tools)
cli.py, MLOps Cookbook on AWS
cloud computing
foundations/building blocks, Cloud Computing Foundations and Building Blocks-Cloud Computing Foundations and Building Blocks

getting started, Getting Started with Cloud Computing-Getting Started with Cloud Computing
machine learning and, Rise of the Machine Learning Engineer and MLOps
cloud MLOps, observability for, Observability for Cloud MLOps
cloud native applications, defined, Key Terms
cloud pipelines
continuous delivery, Using Cloud Pipelines-Continuous improvement
controlled rollout of models, Controlled Rollout of Models
testing techniques for model deployment, Testing Techniques for Model Deployment-Continuous improvement
Cloud Run, Google Cloud Platform Overview
cloud shell development environments, Cloud Shell Development Environments-Cloud Shell Development Environments
Cloud9 (see AWS Cloud9)
Cloudshell, Cloud Shell Development Environments-Cloud Shell Development Environments
cluster
configuring, Configuring a Cluster-Configuring a Cluster
deploying models to a compute cluster, Deploying Models to a Compute Cluster-Deploying a Model
inference versus compute, Configuring a Cluster
command line interface (CLI) tools, Building MLOps Command Line Tools and Microservices-Conclusion
basics, Command Line Tools-Modularizing a Command Line Tool
building a cloud-based CLI, Building a Cloud-Based CLI
creating a dataset linter, Creating a Dataset Linter-Creating a Dataset Linter
machine learning CLI workflows, Machine Learning CLI Workflows-Conclusion
MLOps Cookbook project, CLI Tools-CLI Tools
modularizing, Modularizing a Command Line Tool-Modularizing a Command Line Tool
Python packaging, Python Packaging
requirements file, The Requirements File
command line, Linux, Bash and the Linux Command Line

Common Vulnerabilities and Exposures (CVEs), Best Practices
competitive advantage, Using the “No Code/Low Code” AWS Comprehend solution
compute cluster
deploying models to, Deploying Models to a Compute Cluster-Deploying a Model
inference cluster versus, Configuring a Cluster
Compute Engine, Google Cloud Platform Overview
compute instances, Azure, Compute Instances-Compute Instances
computer vision
AWS, Computer vision-Computer vision
Google's AutoML and edge computer vision, Apple’s Core ML Tools-Apple’s Core ML Tools
configuration
Bash shell, Configuration
cluster, Configuring a Cluster-Configuring a Cluster
configuring continuous integration with GitHub Actions, Configuring Continuous Integration with GitHub Actions-Configuring Continuous Integration with GitHub Actions
runtime, Azure ML Pipelines
container as a service (CaaS)
AWS, AWS CaaS-AWS CaaS
MLOps design pattern, MLOps Design Patterns
containerized workflow, AWS Lambda-SAM Containerized Deploy-AWS Lambda-SAM Containerized Deploy
containers, Containers-Serving a Trained Model Over HTTP
best practices, Best Practices-Best Practices
build once, run many MLOps workflow, Build Once, Run Many MLOps Workflow
creating, Creating a Container-Creating a Container
defined, Key Terms
managed ML systems and, Containers for Managed ML Systems-Build Once, Run Many MLOps Workflow
monetizing MLOps, Containers in Monetizing MLOps
running, Running a Container-Running a Container
runtime, Container Runtime

serving a trained model over HTTP, Serving a Trained Model Over HTTP-Serving a Trained Model Over HTTP
continuous delivery (CD), DevOps and MLOps, Continuous Delivery for Machine Learning Models-Conclusion
(see also CI/CD)
cloud pipelines for, Using Cloud Pipelines-Continuous improvement
defined, Key Terms
DevOps best practice, DevOps and MLOps
GCP and, Continuous Integration and Continuous Delivery-Continuous Integration and Continuous Delivery
infrastructure as code for continuous delivery of ML models, Infrastructure as Code for Continuous Delivery of ML Models-Infrastructure as Code for Continuous Delivery of ML Models
packaging for ML models, Packaging for ML Models-Packaging for ML Models
testing techniques for model deployment, Testing Techniques for Model Deployment-Continuous improvement
continuous improvement, Implementing DevOps, Continuous improvement
continuous integration (CI), DevOps and MLOps
(see also CI/CD)
configuring with GitHub Actions, Configuring Continuous Integration with GitHub Actions-Configuring Continuous Integration with GitHub Actions
defined, Key Terms
DevOps best practice, DevOps and MLOps
GCP and, Continuous Integration and Continuous Delivery-Continuous Integration and Continuous Delivery
convergence, Optimization
Coral Project, Coral-Coral
Core ML, Apple's Ecosystem, Apple's Core ML Tools-Apple's Core ML Tools, Apple Core ML-Apple Core ML
Create ML, Apple's AutoML: Create ML-Apple's AutoML: Create ML
customer-focused education, Focus on the customer
CVEs (Common Vulnerabilities and Exposures), Best Practices
cybersecurity, Data Governance and Cybersecurity

D

data drift (see drift)
data engineering
    AWS Certified Machine Learning - Specialty certification, Data Engineering-Data Engineering
    defined, Key Terms
    GCP, DataOps on GCP: Applied Data Engineering-DataOps on GCP: Applied Data Engineering
    ML hierarchy of needs and, DataOps and Data Engineering
data governance, Data Governance and Cybersecurity, Data Engineering
data lake, DataOps and Data Engineering, Data Engineering
data science
    AutoML versus, MLOps Industrial Revolution
    as foundational skill, Doing Data Science-Doing Data Science
data warehouses, Feature Stores versus, Feature Stores
DataOps
    GCP, DataOps on GCP: Applied Data Engineering-DataOps on GCP: Applied Data Engineering
    ML hierarchy of needs and, DataOps and Data Engineering
dataset linter, Creating a Dataset Linter-Creating a Dataset Linter
datasets
    baseline versus target, Monitoring Drift with AWS SageMaker
    versioning, Versioning Datasets
Davis, Purnell, Mechanical Turk Data Labeling
debugging (see troubleshooting)
deep learning intuition, Optimization-Optimization
DeepLens, Computer vision-Computer vision
dependencies
    defining in requirements.txt file, The Requirements File
    pinning, Best Practices
    Python packaging and, Python Packaging
deployment
    Azure, Deploying-Versioning Datasets
    blue-green versus canary, Controlled Rollout of Models
    deploying a model, Deploying a Model-Deploying a Model

MLOps, DevOps and MLOps combined best practices?
registration, Registering Models-Registering Models
troubleshooting deployment issues, Troubleshooting Deployment Issues-Debugging Locally
descriptive statistics, Descriptive Statistics and Normal Distributions-Descriptive Statistics and Normal Distributions, Descriptive Statistics and Normal Distributions
design patterns, MLOps Design Patterns
development environments, Cloud Shell Development Environments-Cloud Shell Development Environments
DevOps
best practices, DevOps and MLOps
defined, What Is MLOps?
implementing, Implementing DevOps-Implementing DevOps
MLOps and, DevOps and MLOps-DevOps and MLOps
MLOps feedback loop, DevOps and MLOps combined best practices?
diet, intermittent fasting and, Data Science Case Study: Intermittent Fasting-Notes on Intermittent Fasting, Blood Glucose, and Food
disaster recovery, defined, Key Terms
disruption (see education disruption)
Docker
containers, Container Runtime
defined, Key Terms
Dockerfile, Creating a Container, MLOps Cookbook on AWS
format container, Key Terms
Doudna, Jennifer, AutoML
drift
monitoring with AWS SageMaker, Monitoring Drift with AWS SageMaker-Monitoring Drift with AWS SageMaker
monitoring with Azure ML, Monitoring Drift with Azure ML-Monitoring Drift with Azure ML

E

EDA (exploratory data analysis), Descriptive Statistics and Normal Distributions, Exploratory Data Analysis (EDA)-Exploratory Data

Analysis (EDA)
edge devices, Edge Devices-Porting Over Non-TPU Models
Apple's ecosystem, Apple's Ecosystem-Apple's Core ML Tools
ASICS and, DevOps and MLOps combined best practices?
Azure Percept, Azure Percept
Coral, Coral-Coral
ORT model format and, Edge Integration-Edge Integration
porting over non-TPU models, Porting Over Non-TPU Models-Porting Over Non-TPU Models
TFHub, TFHub
education disruption, Education Disruption-Disruption of hiring process
current state of higher education that will be disrupted, Current State of Higher Education That Will Be Disrupted-Current State of Higher Education That Will Be Disrupted
10X better education, 10X Better Education-Disruption of hiring process
educational resources, Additional Educational Resources-Conclusion
additional MLOps critical thinking questions, Additional MLOps Critical Thinking Questions-Additional MLOps Critical Thinking Questions
additional MLOps educational materials, Additional MLOps Educational Materials
education disruption, Education Disruption-Disruption of hiring process
Elastic Beanstalk Flask app, MLOps on AWS-MLOps on AWS
ELI5, Model Explainability, Model Explainability
engineering, science versus, Rise of the Machine Learning Engineer and MLOps
explainability, Azure's AutoML, Model Explainability-Model Explainability
exploratory data analysis (EDA), Descriptive Statistics and Normal Distributions, Exploratory Data Analysis (EDA)-Exploratory Data Analysis (EDA)

F

FaaS (see function as a service)
Faber, Issac, Focus on Prediction Accuracy Versus the Big Picture
Fargate, AWS CaaS-AWS CaaS
fasting, intermittent, Data Science Case Study: Intermittent Fasting-Notes on Intermittent Fasting, Blood Glucose, and Food
Feature Stores, Feature Stores-Feature Stores
feedback loop, DevOps and MLOps combined best practices?
FLAML, FLAML-FLAML
Flask microservice, Flask Microservice-AWS App Runner Flask microservice
    automatically building container via GitHub Actions, Automatically build container via GitHub Actions and push to GitHub Container Registry
    AWS App Runner and, AWS App Runner Flask microservice-AWS App Runner Flask microservice
    build example, AWS CaaS-AWS CaaS
    containerized, Containerized Flask microservice
food, intermittent fasting and, Data Science Case Study: Intermittent Fasting-Notes on Intermittent Fasting, Blood Glucose, and Food
foundational skills for MLOps, MLOps Foundations-Conclusion
    Bash shell and commands, Bash Shell and Commands-Writing a Script

    cloud shell development environments, Cloud Shell Development Environments-Cloud Shell Development Environments
    doing data science, Doing Data Science-Doing Data Science
    getting started with cloud computing, Getting Started with Cloud Computing-Getting Started with Cloud Computing
    Linux command line, Bash and the Linux Command Line
    machine learning key concepts, Machine Learning Key Concepts-Machine Learning Key Concepts
    math for programmers crash course, Math for Programmers Crash Course-Optimization

Python (crash course), Python Crash Course-Python Crash Course
Python (tutorial), Minimalistic Python Tutorial
Fox, Justin, AutoML
function as a service (FaaS)
AWS Lambda, Python Crash Course
defined, Key Terms

G

GCP (see Google Cloud Platform)
Gilovich, Thomas, AutoML
GitHub Actions
automatically building container via, Automatically build container via GitHub Actions and push to GitHub Container Registry
configuring continuous integration with, Configuring Continuous Integration with GitHub Actions-Configuring Continuous Integration with GitHub Actions
GCP versus, Continuous Integration and Continuous Delivery
GitHub Container Registry, pushing container to, Automatically build container via GitHub Actions and push to GitHub Container Registry
GitHub, file size limitations for, Infrastructure as Code for Continuous Delivery of ML Models
GKE (Google Kubernetes Engine), Google Cloud Platform Overview, Key Terms
Google
AutoML and edge computer vision, Apple's Core ML Tools-Apple's Core ML Tools
Professional Machine Learning Engineer certification, Rise of the Machine Learning Engineer and MLOps
Google App Engine, Google Cloud Platform Overview, Operationalizing ML Models
Google BigQuery, Google Cloud Platform Overview, Cloud Native Database Choice and Design-Cloud Native Database Choice and Design
Google Cloud Build, Continuous Integration and Continuous Delivery
Google Cloud Functions, DataOps on GCP: Applied Data Engineering-DataOps on GCP: Applied Data Engineering
Google Cloud Platform (GCP), MLOps for GCP-Conclusion

advantages of using, Google Cloud Platform Overview
applied data engineering on, DataOps on GCP: Applied Data Engineering-DataOps on GCP: Applied Data Engineering
certifications, GCP
cloud native database choice/design, Cloud Native Database Choice and Design-Cloud Native Database Choice and Design
continuous integration/continuous delivery, Continuous Integration and Continuous Delivery-Continuous Integration and Continuous Delivery
disadvantages of using, Google Cloud Platform Overview-Google Cloud Platform Overview
Kubernetes and, Kubernetes Hello World-Kubernetes Hello World
major components, Google Cloud Platform Overview
operationalizing ML models, Operationalizing ML Models-Operationalizing ML Models
overview, Google Cloud Platform Overview-Cloud Native Database Choice and Design
Google Cloud Run, Google Cloud Platform Overview
Google Kubernetes Engine (GKE), Google Cloud Platform Overview, Key Terms
greedy algorithms, Optimization-Optimization

H

Haber, Jonathan, The Perfect Technique Versus the Real World
Hardgrove, Jacob, The Perfect Technique Versus the Real World
Hargadon, Andrew, Conclusion
Harris, Tristan, Ethical and Unintended Consequences
health issues, in home work area, Health and work area
hierarchy of needs, ML, An MLOps Hierarchy of Needs-DevOps and MLOps combined best practices?
configuring continuous integration with GitHub Actions, Configuring Continuous Integration with GitHub Actions-Configuring Continuous Integration with GitHub Actions
DataOps and data engineering, DataOps and Data Engineering
implementing DevOps, Implementing DevOps-Implementing DevOps

MLOps at top of, MLOps-DevOps and MLOps combined best practices?
platform automation, Platform Automation
hiring process, disruption of, Disruption of hiring process
hobbies, Getting a Job: Don't Storm the Castle, Walk in the Backdoor
Horizontal Pod Autoscaler (HPA), Kubernetes Hello World
housing affordability, Regional job market that will be disrupted
HTTP, serving a trained model over, Serving a Trained Model Over HTTP-Serving a Trained Model Over HTTP
htwtmlb.csv, MLOps Cookbook on AWS
Hugo websites, Using Hugo static S3 websites-Using Hugo static S3 websites

I

IaC (see infrastructure as code)
ignorance, benefits of, Unlikely Benefits of Ignorance in Building Machine Learning Models-Unlikely Benefits of Ignorance in Building Machine Learning Models
implementation of MLOps
data governance and cybersecurity, Data Governance and Cybersecurity
design patterns, MLOps Design Patterns
global recommendations, Final Recommendations to Implement MLOps
recommendations for, Final Recommendations to Implement MLOps-MLOps Design Patterns
inference clusters, Configuring a Cluster
infrastructure as code (IaC)
continuous delivery of ML models and, Infrastructure as Code for Continuous Delivery of ML Models-Infrastructure as Code for Continuous Delivery of ML Models
DevOps best practice, DevOps and MLOps
input/output
Bash shell, Input/Output
instructions (container keywords), Creating a Container
instrumentation (DevOps best practice), DevOps and MLOps

intermittent fasting, Data Science Case Study: Intermittent Fasting-Notes on Intermittent Fasting, Blood Glucose, and Food
interoperability, Machine Learning Interoperability-Conclusion
Apple Core ML, Apple Core ML-Apple Core ML
edge integration, Edge Integration-Edge Integration
importance of, Why Interoperability Is Critical-Why Interoperability Is Critical
ONNX, ONNX: Open Neural Network Exchange-Deploy ONNX to Azure
IPython interpreter, defined, Key Terms
Isaacson, Walter, AutoML

J

James, Lebron, Influencer Rank
job markets, regional, Regional job market that will be disrupted
JSON, defined, Key Terms

machine learning project structure, Implementing DevOps-Implementing DevOps
minimalistic tutorial, Minimalistic Python Tutorial
MLOps Cookbook, MLOps Cookbook on AWS-AWS App Runner Flask microservice
modifying log levels, Modifying Log Levels
project scaffold, Implementing DevOps
requirements file, The Requirements File
slowness of, Python Crash Course
testing/linting code, Getting Started with Cloud Computing
Python functions, Minimalistic Python Tutorial, Serverless Cookbook
Python SDK, Azure CLI and Python SDK-Azure CLI and Python SDK
Python virtual environment, defined, Key Terms

PyTorch, converting into ONNX, Convert PyTorch into ONNX-Convert PyTorch into ONNX

R

Red Hat, Container Runtime
regional job markets, Regional job market that will be disrupted
registration, Azure, Registering Models-Registering Models
registries, Containers
reinforcement learning, Machine Learning Key Concepts
"remote first" education, Async and remote first
remote work, Remote Work-Location, Location, Location
  equipment for, Network-Home workspace virtual studio setup
  health issues, Health and work area
  home work area, Home Work Area
  home workspace virtual studio setup, Home workspace virtual studio setup
  location, Location, Location, Location
  network, Network
requirements.txt, MLOps Cookbook on AWS, The Requirements File
requirements.txt file, Implementing DevOps, The Requirements File
Ridley, Matt, MLOps Industrial Revolution, Conclusion
rule of 25% (income), Rule of 25%
rule of 25% (MLOps), Conclusion
run commands, Run Commands
runtime configuration, Azure ML Pipelines

S

S3 (see AWS S3)
SageMaker, Platform Automation
  model monitoring, Observability for Cloud MLOps
  monetizing MLOps, Containers in Monetizing MLOps
  monitoring drift with, Monitoring Drift with AWS SageMaker-Monitoring Drift with AWS SageMaker
  pipeline creation, Using Cloud Pipelines-Using Cloud Pipelines
SageMaker AutoPilot, AWS AutoML-AWS AutoML

SAM (AWS Serverless Application Model)
AWS Lambda recipes, AWS Lambda Recipes-AWS Lambda-SAM Containerized Deploy
AWS Lambda-SAM containerized deploy, AWS Lambda-SAM Containerized Deploy-AWS Lambda-SAM Containerized Deploy
SAM Local, AWS Lambda-SAM Local
science, engineering versus, Rise of the Machine Learning Engineer and MLOps
script, writing a, Writing a Script
self-handicapping, AutoML
serverless (term), Key Terms
Serverless Application Model (see SAM)
serverless methodology
AWS, Serverless Cookbook-Serverless Cookbook
creating a serverless function, Creating a Serverless Function-Creating a Serverless Function
as recommended MLOps design pattern, MLOps Design Patterns
service principal, Service Principal-Service Principal
SHAP, Model Explainability, Model Explainability
shell
Bash shell and commands, Bash Shell and Commands-Writing a Script
cloud shell development environments, Cloud Shell Development Environments-Cloud Shell Development Environments
defined, Bash Shell and Commands
shell script, writing a, Writing a Script
Silver, Nate, Focus on Prediction Accuracy Versus the Big Picture
Simon, Julien, Applying AWS Machine Learning to the Real World-Applying AWS Machine Learning to the Real World
Sinclair, Upton, AutoML
Spark-centric design, MLOps Design Patterns
SQL-related certifications, SQL-Related Certifications
Sqor sports social network case study, MLOps Projects at Sqor Sports Social Network-Athlete Intelligence (AI Product)
Athlete Intelligence (AI product), Athlete Intelligence (AI Product)-Athlete Intelligence (AI Product)
influencer rank, Influencer Rank

Mechanical Turk data labeling, Mechanical Turk Data Labeling
SQS queue, defined, Key Terms
SSH access, Running a Container
statistics, descriptive, Descriptive Statistics and Normal Distributions-Descriptive Statistics and Normal Distributions
supervised machine learning, Machine Learning Key Concepts
swagger, defined, Key Terms

T

Taleb, Nassim, Focus on Prediction Accuracy Versus the Big Picture
target dataset, baseline dataset versus, Monitoring Drift with AWS SageMaker
task tracking (in technical project management), Task Tracking
technical communication (DevOps best practice), DevOps and MLOps
technical portfolio, building a, Building a Technical Portfolio for MLOps-Getting a Job: Don't Storm the Castle, Walk in the Backdoor
project example: cloud native ML application or API, Project: Build Cloud Native ML Application or API
project example: Docker and Kubernetes container project, Project: Docker and Kubernetes Container Project
project example: edge ML solution, Project: Build Edge ML Solution
project example: serverless AI data engineering pipeline, Project: Serverless AI Data Engineering Pipeline
strategies for getting a job, Getting a Job: Don't Storm the Castle, Walk in the Backdoor
technical project management, Technical Project Management-Task Tracking
as DevOps best practice, DevOps and MLOps
project plan, Project Plan
task tracking, Task Tracking
weekly demo, Weekly Demo
technology certifications (see certifications)
TensorFlow
converting into ONNX, Convert TensorFlow into ONNX-Convert TensorFlow into ONNX
TFHub, TFHub

TensorFlow Developer Certificate, GCP
TensorFlow Playground, Optimization
TensorFlow Processing Unit (see TPU)
"10X better" education system, 10X Better Education-Disruption of hiring process
Terrell, Dave, Focus on Prediction Accuracy Versus the Big Picture
testing
automated checks, Automated checks
continuous improvement and, Continuous improvement
linting, Linting
model deployment, Testing Techniques for Model Deployment-Continuous improvement
Python code, Getting Started with Cloud Computing
TFHub (TensorFlow Hub), TFHub
theory of competitive advantage, Using the “No Code/Low Code” AWS Comprehend solution
Thiel, Peter, Current State of Higher Education That Will Be Disrupted
token-based authentication, Authenticating API Services
TPU (TensorFlow Processing Unit)
Coral Project and, Coral-Coral
porting over non-TPU models, Porting Over Non-TPU Models-Porting Over Non-TPU Models
troubleshooting
Application Insights, Application Insights
debugging locally, Debugging Locally-Debugging Locally
deployment issues, Troubleshooting Deployment Issues-Debugging Locally
retrieving logs, Retrieving Logs

U

unsupervised machine learning, Machine Learning Key Concepts-Machine Learning Key Concepts
USB Accelerator, Coral
utilscli.py, MLOps Cookbook on AWS

V

versioning, of datasets, Versioning Datasets
Vertex AI, Google Cloud Platform Overview
virtual environment, Python, Implementing DevOps
virtual machines
containers versus, Containers
defined, Key Terms
vision (see computer vision)

Y

YAML, defined, Key Terms

Z

Zhang, Feng, AutoML
ZSH, Bash Shell and Commands, Configuration
